DETAILED ACTION

Response to Amendment

Applicant's amendments and arguments have been reviewed and are found to be persuasive. All pending claims stand as allowable over the prior art of record and all previous rejections are removed.

Allowable Subject Matter

1. Claims 1-11 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. While the articles by Chen and Xia show power protection schemes similar to that of the current invention, applicant's arguments are persuasive that neither of these references taken alone or in combination with the prior art of record disclose "measuring phasor data for voltages and currents at a second plurality of locations of the network, transmitting said phasor data to a central processing device, emulating, in the central processing device, local protection functions that are implemented in the local protection devices, and executing, in accordance with a given redundancy strategy, control commands that are issued redundantly by the local protection devices and by the central processing device."
4. It is this emulation and command issuing step, in combination with the remaining elements and features of the invention, that the applicant's invention defines over the prior art of record.

Art Unit: 2125

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
